**RE: RCRA Corrective Action
Program Quarterly Progress
Report No. 66
EPA Facility ID Number PRD090021056**

Dear Ms. Guerrero:

Enclosed are three paper copies and three electronic copies (compact discs) of Bristol-Myers Squibb Manufacturing Company's (BMSMC) quarterly progress report of corrective action activities being conducted at our pharmaceutical manufacturing facility located in Humacao, Puerto Rico. The progress report is being submitted in accordance with the requirements of Module III, Condition B.8(a) of BMSMC's RCRA Hazardous Waste Management Permit. This progress report includes corrective action activities conducted during the period January 1, 2017 through March 31, 2017.

BMSMC received the U.S. Environmental Protection Agency (USEPA) and the Puerto Rico Environmental Quality Board (PREQB) technical comments on the *RCRA Corrective Action Program Quarterly Progress Report No. 63 2nd Quarter 2016* on March 16, 2017. We are presently assessing the applicability of these data validation comments to Progress Reports No. 64, No. 65, and No. 66. BMSMC will revise these three progress reports (or sections therein) to address any data validation comments, as appropriate, by June 15, 2017.

Please feel free to call me at (787) 656-4364 or Mr. Francisco Burgos, Environmental Affairs Manager at (787) 656-4471 if you have any questions.

Cordially,

Alvin Crespo, Director
Environmental, Health and Safety

CC: Manager, Land Pollution Control Program, PREQB
Mrs. Socorro Martinez, USEPA – CEPD
